WORKSHOP

Expand Your Reality

A look into Virtual and Augmented Reality

ABOUT THE WORKSHOP

Your About to Change Your Reality

We all view the world around us through our senses and our perceptions of objects we come into contact with. Virtual and Augmented reality gives us the opportunities to alter or change some of the reality around us and have our brains respond to it. These changes in reality offer us the ability to visit and interact with objects that we may not normally have the opportunity to. Spend the day exploring the different aspects of Virtual and Augmented Reality.

WORKSHOP SESSION EXAMPLES

- What is Virtual Reality? Take the opportunity to start from the beginning and explore virtual and augmented reality
- Find different Apps on IOS and Android to submerge you into the world of Virtual and Augmented Reality. Explore how these Apps can be used in your classroom instruction
- Google Expeditions- take some time to explore and learn about how to use Expeditions and the set-up needed to implement this application in your classroom
- Not everyone had the budget for expensive equipment to make your own Virtual Reality experience. Find out how to make your own for little money
- Have a hands-on session on creating your own Augmented Reality worksheets, books, and field trips.

EVENT DETAILS

January 24, 2019

9:00 AM- 4:00 PM

Manhattan College
Commons Building

4513 Manhattan College
Pkwy, Bronx, NY 10471

SCHEDULE

8:30	Registration
9:00-10:00	Session 1
10:05-11:05	Session 2
